

Bat Fold

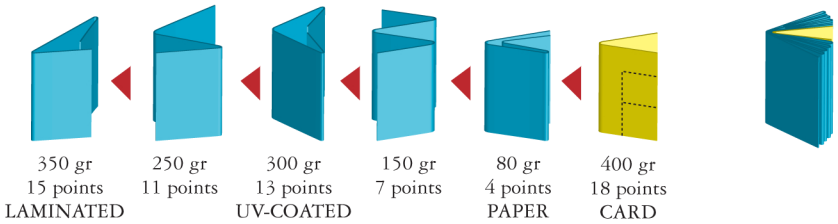

KNIFE CREASING MACHINE + PAPER AND CARDBOARD FOLDING MACHINE

A single machine that matches a knife creasing group with a folding unit: it has been designed to fold from 80 to 350 gr. (4 - 17½ points) papers, even with gate folds. It can quickly and accurately carry out offset or digital printing jobs, including wrong grains or UV-coated/laminated papers. It can process leaflets, booklets, cards, soft covers for stitched booklets and so on...

EXAMPLE WORKS
